

## Online Safety at Burton Manor

The use of technology both within school and at home is growing. The internet offers a fantastic range of resources and opportunities to enhance children's learning and personal development.

Access to the internet is becoming easier and children increasingly have access to devices such as tablets, laptops, smart phones and game consoles.

It is important to remember to supervise children's use of the internet and to ensure that they access age appropriate information or resources.

As a school we are committed to the safe use of new technologies to enhance learning and encourage responsible use of ICT to minimise potential on-line risks.

The information below is shared with all pupils to encourage them to be SMART when working on-line.

	Keep safe by being careful not to give out personal information when you're chatting or posting online. Personal information includes your email address, phone number and password.
	Meeting someone you have only been in touch with online can be dangerous. Only do so with your parents' or carers' permission and even then only when they can be present. Remember online friends are still strangers even if you have been talking to them for a long time.
	Accepting emails, IM messages, or opening files, pictures or texts from people you don't know or trust can lead to problems – they may contain viruses or nasty messages!
	Someone online might lie about who they are and information on the internet may not be true. Always check information with other websites, books or someone who knows. If you like chatting online it's best to only chat to your real world friends and family.
	Tell your parent, carer or a trusted adult if someone or something makes you feel uncomfortable or worried, or if you or someone you know is being bullied online.
